Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 10-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Hollingsworth (US Patent no. 5,217,119 cited by applicant). Hollingsworth shows a carrying case having an internal suspension system (24). The suspension system including a flexible suspension material (30) operably engaged to a cradle/support panel (28) to allow the cradle to travel up and down within the carrying case. A strap (36) is also disclosed for securing an electronic device (26), and imparting a tension to the flexible suspension material (30) via the electronic device as the strap is tied down. As to the orientation of the suspension material to the “lateral sides,” it is considered met by Hollingsworth since any pair of sides can be called the lateral sides.

Allowable Subject Matter

3. Claims 1-9 are allowed.

4. Claims 14-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
